**Subject:** EduQuest - Validation Class  
**Importance:** High

Jeff, there is a class next week (Wed, 2/11...8:30 -4:30 PM) at the Hyatt on "Validation of Computerized Systems". This class is taught by EduQuest and has more of a technical slant. It's recommended for manager level and is NOT specific on exactly how to validate systems at code level. We'll be offering those later.

If there is someone in your area that still needs training on the FDA Quality Systems Regulation (QSR), please have them get in touch with me or Barbara Jones (cc'ed here) to schedule themselves into the session.  
Jim
